

Dear Parents

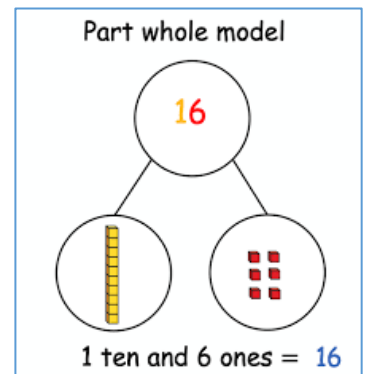

At Marston Moreteyne School we access and use White Rose Maths to support our Mathematics planning.

White Rose have launched their new, free 1-Minute Maths app that helps children to build greater number confidence and fluency. It's all about targeted practice in engaging, one-minute chunks!

The app is free and can be downloaded from the Apple App Store and Google Play, it can be played without internet access and does not require a login. The White Rose website also has downloadable posters to help parents and children keep track of their score.

Although it is currently aimed at children in Key Stage 1, it would also be good for all children to consolidate their understanding by revisiting maths concepts, helping them to recall facts with increasing speed and accuracy. Our Acorn children will be able to access the subitising topic, looking at pictures and representations of number and recognising how many there are, a skill they are very well practiced at! It is recognised that subitising can also help children learn addition and subtraction facts. As children progress through the school, recognising how many there are, by combining numbers of smaller subgroups, will help them to develop part-whole awareness and build familiarity with number combinations.

Lots of the children have already enjoyed the app in school and agree that it is fun, quick and reinforces key concepts we teach in school.

Thank you for your continued support.

Mrs Nelmes.

Maths lead.
